QUARTERLY ACTIVITY REPORT OCTOBER- DECEMBER, 2011

INTRODUCTION

The 4th quarter was characterized by splash floods which caused disaster in Sololo district during the months of November and early December. CIPAD through OVC Sololo project supported the flood displaced people targeting the beneficiaries of Sololo project. The floods halted ongoing project like finishing of basement construction plastic tanks for schools as roads were impassable due to erosions and mud

Obbitu children village was not seriously affected by floods since environment was conserved and with adequate vegetation cover.

PLANNED ACTIVITIES TO BE ACCOMPLISHED

1. Supervision routine Obbitu village activities
2. HBC food rations
3. Completion drought tank basement construction
4. Flood emergency responses
5. Health assessment
6. OVC management committee meeting
7. Revising CIPAD constitution to facilitate registration for NGO certificate

	109-0319			
	103-0276			
	103-0274			

Family visit usually check for the following

1. education performance
Low performance in public schools. It was not easy school performance record was poorly record or kept at home
2. health status of the OVC
3. personal hygiene of the children
4. nutritional status of the children
5. home environment of the family
6. advice the guardians on the importance of providing accurate child information and avail the children during health care assessment

OVC NOT COOPERATIVE DURING HEALTH ASSESSMENT AND HOME VISIT

The tabulated list of OVC have difficult to access and collect their information. Some are grown ups, others dropped out of school, while others have left sololo. Some deliberately refuse to cooperate with the field officer and health assessment team. Most of them are in adolescence age and feel big adults to participate in health assessment.

The OVC management committee discussed the list and strongly supported them to be dropped out of the program, And replaced with other needy OVC.

CHILD NO.	CHILD NAME	CURRENT STATUS	REMARKS
005-0013		Dropped out of school. Counseled with no improvement	To be dropped from program
005-0015		School dropout left sololo for moyale. Uncooperative and rude to chiefs and staffs	To be Dropped out of program
057-0147		Changed rresidence. Cannot	To be dropped

		be reached for information update	
098-0256		School dropout and changed residence to Ethiopia	To be dropped
098-0257		::	::
004-0011		Over age 21 years old, shy and not willing to give information	::
082-0218		Changed residence to nairobi	::
018-0052		Over age and out of schousehool	::
041-0100		School dropout casual worker in a local eating	::
007-0019		Un cooperative during health assessment and child information	“

XY HH, NO.005 will also be deregistered from program because the 2 children are out of the program.

YX HHNO.098 will be deregistered because they relocated to Tuqa in Ethiopia.

HEALTH CARE OBBITU CHILDREN

Generally the children have been healthy, common complain included ring worms, stomach ache and URTI. The cases mostly handled at Obbitu village with a first Aid kit.

Circumcision was done for 6 boys at Sololo hospital. 1 case developed complication and was admitted to Sololo hospital for 2 days

EDUCATION Obbitu children had impressive performance. Though some did poorly and were retained in the previous class. Obbitu children had text book ratio of 1:2. They had continuous supply of exercise books, Pens, erasers pencils and

ENTERTAINMENT

Cinemas continued over the weekends. There was skipping ropes and tyres which kept the children busy and active in Obbitu village.

WATER FOR OBBITU CHILDREN VILLAGE

The quarter was characterized by heavy down pour of rain. The tanks for Obbitu roof harvest were all full. Currently donkey fetch water from the dam for construction activities, washing floors and watering planted trees

LIGHTING:

The solar charger, inverter on father's house is fault. Some bulbs at children house is also blown off and requires replacement. We changed the regulator of the big generator and a new battery

STAFFS AT OBBITU VILLAGE

The mother caretakers and house helper are core in welfare of children they are fine and well motivated. During the months of November and December MR. Abdi wario was hired to on job training while Tume was preparing for her leave.

Mr. Gufu Guyo Reported full time at CIPAD and started to supervise the routine OVC activities Sololo project

OBBITU MANAGEMENT COMMITTEE

The meeting for committee was schedule for December, but due to floods was not done in December.

HBC FOOD DISTRIBUTION

Food and non food items distributed for families of home based support were as follows

1. Maize
2. Beans
3. Cooking oil
4. Sugar
5. Tea leaves
6. Salt
7. Rice
8. Bar soap

The table below summaries HBC foods which was bought and distributed by CIPAD.

FOOD ITEMS	QTY OCTOBER	QTY. NOVEMEBR	QTY. DECEMBER	TOTAL KG	TOTAL COST
maize	0gs	3,105kgs	3,220kg	6,325	236,210
Rice	10 bags		0	10 bags	42,000

Emergency flood response	0	0	233,400	233,400
Fund transfer to Gufu Duba	120,000	0	310,000	430,000
GRAND TOTAL	825,685	703,625	1,313,865	2,843,175

WATER TRUCKING

Water distribution to schools and community members .beneficiaries of Sololo project received 20 litre jerken of water from Obbitu children village. 4 schools benefitted. The construction of basement was not completed due to floods, impassable roads and closure of schools over December holidays which made mobilization of c community

contribution a challenge. It was successfully completed in January except for Hamballo which the road was cut off due to a deep valley as result of heavy floods.

FUND RAISING

AMREF Maanisha program approved OVC secondary schools fees of KSHs 75,000 and 4 dairy goats for Obbitu children

Obbitu children village have started a poultry project with 11 chicken as a free range. A semi free Poultry house will be considered in near future

CHALLENGES

1. Floods and impassable roads to OVC centres and school to complete basement for tanks
2. The Solar electricity was faulty hence did not supplement power supply during the day and evening after 9.00PM
3. Some OVC have grown into adolescence stage. They have a unique behaviour which requires counseling. Maybe stigmatize the program for their social status. Or HIV stigma

CONCLUSION

Despite the drought and the floods, most activities were completed as planned. December was busy one due to update information of OVCs

CIPAD constitution was revised line with the requirement for Ngo registration.

GUFU GUYO

CIPAD COORDINATOR
