CIPAD WATER UTILIZATION POLICY

Obbitu children village has a total capacity to harvest 170,000 litres from the roofs during rain season.

Through Dakakate rock catchment pan 270,000 litres of water can be harvested as a runoff channeled to the pan.

Therefore the total volume of water stored is approximately, 440,000 litres of water.

CIPAD shall use this water primarily for

1. domestic purpose by Obbitu children village
2. Carry out irrigation scheme to cultivate and produce fruits and vegetables like kales, tomatoes, moringa tree and other fruit trees.

CIPAD shall fund raise to mitigate water shortage in the community during the time of emergencies through water trucking program

CIPAD shall provide water in the following categories.

1. Provide 20 litres of water per day for 110 families of OVC registered with Sololo project.
2. House holds headed by the elderly and persons with disability – 100 households
3. Neighboring community of Raamole and Ola oba – 83 households.
4. 10 Schools in Sololo district to support school feeding program and enhance children retention in class and reduce malnutrition among school going age children

CIPAD shall collaborate with government line ministries like ministry of water, Education and provincial Administration in providing water for the vulnerable families in Sololo district.

CIPAD shall involve the OVC management community to participate in identifying the right target beneficiaries. This policy document will be shared with the DSG to avoid duplication of activities.

GUFU G. GUYO
